

Basic safety rules for journalists, photographers, TV operators and technical workers of 1000 km Parnu race powered by Hankook

1. Safety briefing is obligatory. Photo/TV vest together with the MEDIA pass is the only valid permission, allowing you to photograph or film during the event. You must inform about the participation in the race in advance (by 15th September 2017). In other case the organizer cannot assure that you will get the vest. The number of the vests is limited.
2. Photo/TV vest is given for a particular person therefore, it cannot be passed on or loaned.
3. Usage of drones is strictly prohibited unless agreed with the organizer differently.
4. Obligatory outfit: only long trousers (certainly not shorts) and upper clothes that cover shoulders (certainly not basketball style singlet).
5. Be particularly careful as you are working during the race time. Your safety depends only on yourself. You must be very observant, because racing cars can come near to you very fast and insensibly. When working at PITLANE and starting zones, take only necessary equipment. Photographers, please, take a note: look through your photos in the safe place.
6. You must unreservedly obey orders by security and officials. Any disregard of these orders can determine canceling of your accreditation.
7. Do not come too close to the racing cars ever. Leave enough space for mechanics who maintain the cars and do not touch the cars. Remember, that some parts of the car can be very hot. Never kneel down on your knees with the intention to photograph the car at close range, because the car can suddenly move.
8. Be particularly careful. A snapped off part of the racing car can injure you therefore always observe the cars which are close to you. Always be ready to hide and consider in advance how to do it.
9. Remember, that 5 minutes preparation sign given by stewards before start (in the starting zone) is obligatory to you, too. It means that you must immediately leave the track. It is not allowed to run or go across the track when the cars are moving in the track. Any going/running across the track at any time means that your accreditation will be canceled without any warning and security guard will pilot you to the spectator zone.
10. It is allowed to photograph or make a film only from the spectators place and the PITLANE. The track is fenced in with a fence or warning stop belt. It is strictly not allowed to overpass it. In the PITLANE you are allowed to be only on the right side of this zone (on the pit side), however you need to know that racing cars stop in this place for maintenance therefore you have to be very careful and do not bother the work of the teams. Photo / TV vests possession does not give you any privileges in the PITLANE area.
11. Do not stand in front of the ambulance, evacuation or stewards car ever. If any accident happens these cars will move without any warning.
12. It is not allowed to photograph or make a film in the zones marked with „No photography allowed“. Publication of the visual material from these zones is the responsibility of the author.

TAKE A NOTE. IF YOU NOTICE THAT ANY OF YOUR COLLEAGUES OR SPECTATORS DO NOT OBEY SAFETY INSTRUCTIONS IMMEDIATELY INFORM THE SECURITY.

IF THERE ARE ANY REASONS WHY THE SECURITY DO NOT LET YOU TO PHOTO/TV PLACES, PLEASE, INFORM THE ORGANIZER IMMEDIATELY BY PHONE 868350494.

I HAVE READ THE SAFETY INSTRUCTIONS AND I ACCEPT TO FOLLOW THEM. I UNDERSTAND THAT ALL RESPONSIBILITY FOR AN ACCIDENT COMES TO ME AND THE ORGANIZER DOES NOT ASSURE SAFETY OF ANY PERSON, WHO IS NOT IN SPECTATORS' PLACE.
