

## quote from the briefing

### pit time

- Display 'P' after crossing Pit In loop
- Back to normal, display Stint time, when exceeding Pit Out.
- Purple display only if there was code-60 when crossing Pit in loop
- **So if you have a purple display, you have to double the penalty at the penalty box!**
- Team manager is responsible for this

### Fuel time

- Display 'F' after crossing Fuel loop
- Back to normal, display stint time when crossing sector loop
- Purple display only if there was code-60 when crossing Fuel loop
- **So if you have a purple display, the amount of fuel is 50%!**
- Team manager is responsible for this.  
You know what is allowed (100%), you know what's 50%.  
Tip: Put a sticker on the tank opening with both amounts

Time of the car in the pit lane is **no part** of the driving time 'P',  
time in the fuel area 'F' **is part** of the driving time.
